TO WHOM IT MAY CONCERN - REFERENCE LETTER FOR JPJ LANDSCAPES

I am pleased to provide this reference for Judy Panton-Jones, with whom Countryline Horticulture has worked in her role as a consultant and professional horticulturist, with a particular focus on the management and control of alien invasive species.

-During the time we have worked with Judy owner of JPJ Landscapes, we have found her and her company to be highly knowledgeable, reliable, and thorough in their work. Their expertise in both the identification of invasive plant species and the application of environmentally sound control measures is of a high standard. They consistently approach projects with professionalism, strategic insight, and a strong environmental ethic.

Countryline have worked closely with JPJ Landscapes at San Lameer Estate since 2022. San Lameer Estate is a 200 hectare site on the South Coast where we are the landscape contractors. Judy provides environmental and horticultural oversight and ensures the agreed scope of works, complied with relevant pest control and environmental legislation, and delivers progress reports that are clear, timely, and actionable.

In addition to technical expertise, JPJ Landscapes has demonstrated strong communication skills — effectively liaising between stakeholders and field teams to ensure alignment, compliance, and environmental integrity.

We have full confidence in her ability to deliver similar oversight and consulting services on future projects and highly recommend Judy Panton-Jones to any organization seeking professional support in the field of invasive species management and contractor supervision.

Sincerely,
Gavin Foster
